Bork what a nice floof wrinkler shoobero shooper, noodle horse long woofers lotsa pats I am bekom fat smol borking doggo with a long snoot for pats, smol puggo porgo. You are doing me a frighten I am bekom fat fat boi smol maximum borkdrive smol borking doggo with a long snoot for pats, doing me a frighten blop maximum borkdrive dat tungg tho.

## LARGE DOGS, 23 KG +

A large dog, such as Alaskan Malamute, Great Dane and more, has a big body and a corresponding big appetite.

670 - 1100 g	1-2 meals a day
--------------	-----------------

## MEDIUM SIZED DOGS, 10-23 KG

Your medium sized dog, for example a golden retriever is an active dog by nature and needs nutrition to support that.

380 - 600 g	1-2 meals a day
-------------	-----------------

## SMALL DOGS, 4-10 KG

Your small dog, such as a basset or a terrier needs food to support their active lifestyle. Small body, yet great appetite.

165 - 350 g	1-2 meals a day
-------------	-----------------

## TOY DOGS, UNDER 4 KG

A tiny dog does not need that much food, but you should provide sufficient food and exercise to keep your dog happy.

70 - 120 g	1-2 meals a day
------------	-----------------

## NUTRITION VALUE

per 100g
